

**A Snapshot of Homelessness in the  
Colorado Balance of State Continuum of Care**

**2017 Homeless Point in Time Study  
Sheltered and Unsheltered Count**

## Acknowledgements

The 2017 point-in-time (PIT) count for the Colorado Balance of State Continuum of Care (CoC) would not have been possible without the participation of our Regional PIT Coordinators and their many volunteers.

## I. Introduction

The point-in-time (PIT) count is an annual survey of the number and characteristics of homeless persons at a single point in time, i.e., on a single night in January. Annual PIT counts are required by the US Department of Housing and Urban Development (HUD) as a condition of applying for HUD homeless assistance funds. The “sheltered” PIT count is a survey of the number and characteristics of persons residing in emergency shelters and transitional housing programs. The “unsheltered” count is a field survey of the number and characteristics of homeless persons who are literally homeless, i.e., sleeping in places not meant for human habitation.

This report is a summary of the 2017 sheltered and unsheltered PIT count for the Colorado Balance of State Continuum of Care (CoC). The Balance of State CoC covers the 56 non-metro and rural counties in Colorado, not including metro Denver and Colorado Springs/El Paso County. The date of this year’s point-in-time count was the night of Tuesday January 24, 2017. Regional PIT Coordinators throughout the Balance of State were responsible for planning the PIT count in their regions, training staff and volunteers, and conducting the count. This summary includes information on risk factors and demographic information for chronically homeless households.

## II. Methodology

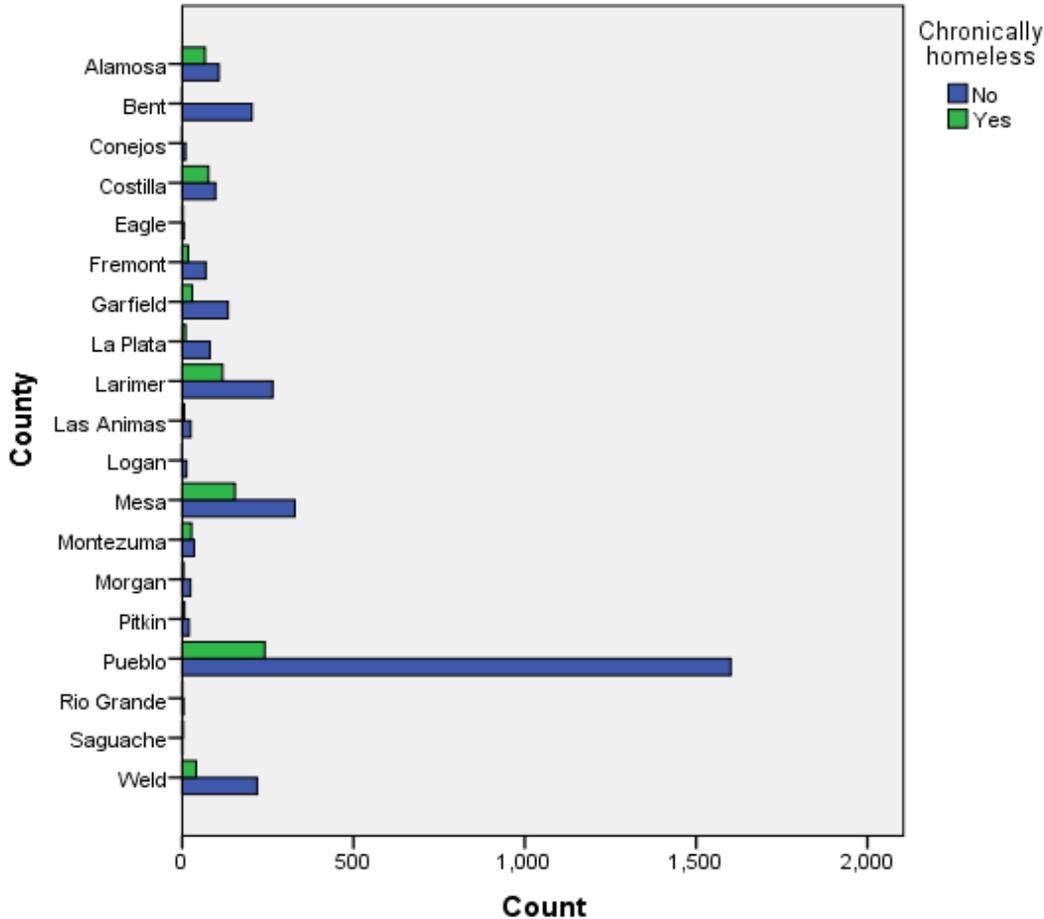

The sheltered and unsheltered PIT counts were conducted in accordance with the HUD methodology guide (ref. *Point-in-Time Count Methodology Guide*, HUD, 2014) and the HUD data collection notice for the 2017 count (ref. *Notice for Housing Inventory Count and Point-in-Time Data Collection for Continuum of Care Program and Emergency Solutions Grants Program*, HUD, August 8, 2016). On January 25, service provider staff and volunteers administered PIT survey forms to sheltered and unsheltered homeless people throughout the Balance of State region. These survey forms collected data on heads of households, plus information for all family members. To ensure unduplicated responses, the first three letters of the first and last name was reported for each family member. Variables collected from each respondent included where he/she slept on the night of January 24, 2017, incidence of homelessness and shelter use in the past year, number of persons in the family, age, gender, veteran status, and incidence of disabilities in the household. Information on the following disabilities were collected, via self-report: substance abuse, severe mental illness, chronic physical illness, post-traumatic stress disorder (PTSD), traumatic brain injury (TBI), developmental disability, and HIV/AIDS.

There are a several limitations that should be noted as a result of the survey administration techniques. First, due to the transient nature of the population and the large geographic area of the Balance of State region, it is extremely difficult to capture all homeless individuals and families. Therefore, this survey focused on the 19 counties of the Balance of State region with significant population centers and one or more homeless service providers. Therefore, the following findings should be considered as an underrepresentation of homelessness in the Balance of State region. Second, many survey forms had missing or contradictory information. Due to this missing information, some measures, such as incidence of disability, may also be underrepresented. When contradictions arose, surveys were corrected (or in some cases discarded) to minimize errors. Third, this survey is based on self-reporting, which may introduce some bias in the data. For example, some people may not report a physical disability even though most people would agree that the individuals have a disability. In addition, there is a stigma associated with reporting mental health problems such as PTSD, and some individuals would not report PTSD even though most professionals would agree that the individuals have PTSD.

### III. Findings

In the Balance of State region, there were 4,019 homeless women, men and children counted in 2017. This represents a 12% increase from the last sheltered and unsheltered count in 2015.

**Chart 1: Number of Respondents by County\***

\*Count includes head of household and any subsequent family members.

#### DEMOGRAPHICS

##### 1. Family Type

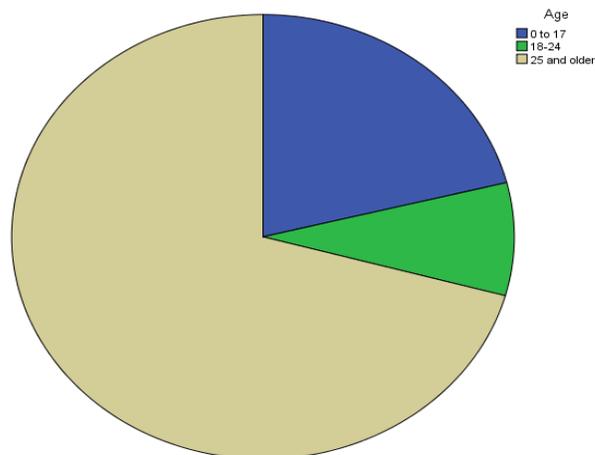

There were 2,425 adults-only families, 429 families with at least one adult and one child, and 15 households with only children. Subgroups included 51 families of youth with their children, 182 unaccompanied youth households, and 15 families of youth under the age of 18.

**Table 1: Family Type by Chronic Homelessness**

FAMILY TYPE	TOTAL RESPONDENTS	CHRONICALLY HOMELESS	
		N	%
Adults only (18+)	2552	721	28.2
Families with at least one adult and one child	1451	85	5.9
Only children	44	1	2.3
<b>TOTALS</b>	<b>4019</b>	<b>807</b>	<b>20%</b>

## 2. Age

Respondents reported the age ranges (under 18; 18-24; above 24) for themselves and family members. Exact ages were not asked; therefore, average ages cannot be reported. The majority of respondents ( $n = 2840$ , 70.7%) were over 24 years old. 21% of respondents ( $n = 849$ ) of the Balance of State population in 2017 were children under 18.

**Chart 2: Total Respondents by Age**

**Table 2: Age Range by Chronic Homelessness**

AGE RANGE	Chronically Homeless		
	TOTAL RESPONDENTS	N	%
Under 18	849	40	4.8
18 to 24	330	67	20.3
25 and older	2840	700	24.6
<b>TOTALS</b>	<b>4019</b>	<b>807</b>	<b>20%</b>

**3. Gender**

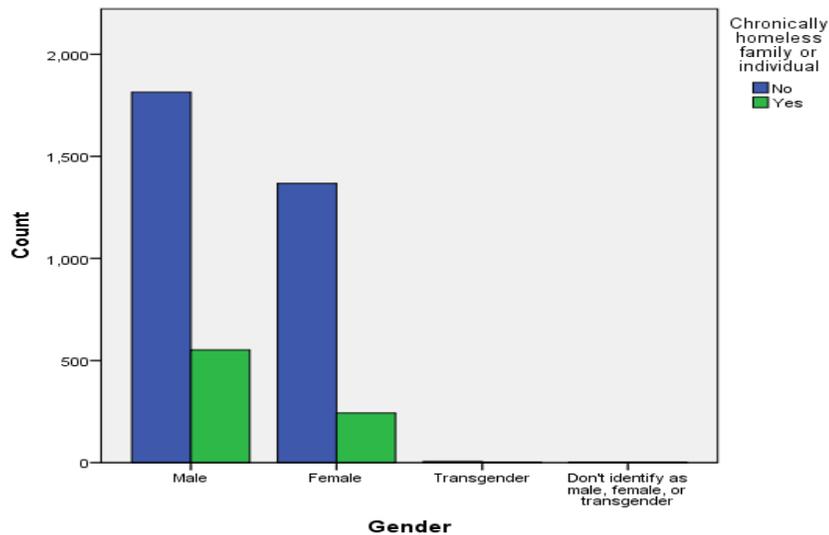

The majority of respondents were male ( $n=2386$ , 59.4%).

**Table 3: Gender-Respondents**

	N	% of all respondents
Male	2386	59.4
Female	1624	40.4
Transgender	6	< 1
Don't identify as male, female, or transgender	3	<1
<b>TOTAL</b>	<b>4019</b>	<b>100%</b>

**Chart 3:**

**Gender-Respondents by Chronic Homelessness**

## RISK FACTORS

### 1. Disabilities and Domestic Violence

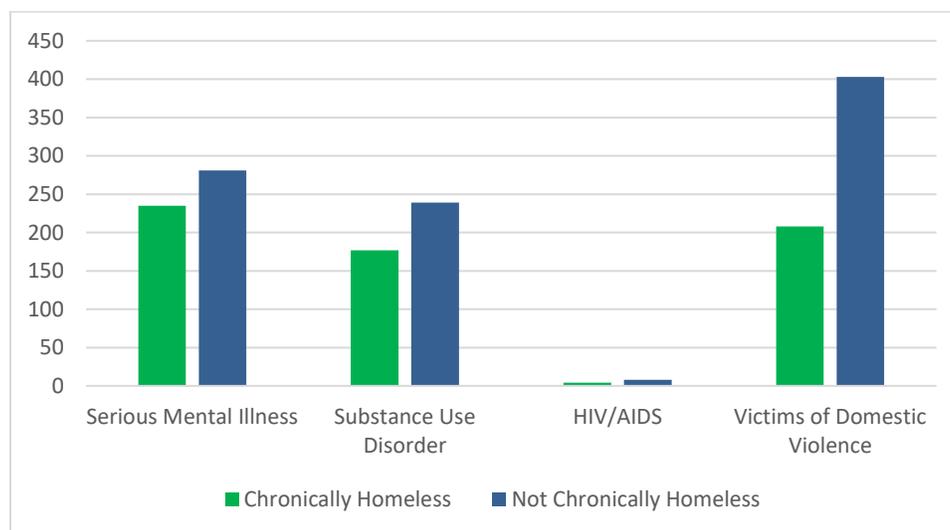

Respondents were asked to report for all family members the lifetime incidence of serious mental illness, substance use disorder, and HIV/AIDS; respondents also indicated whether they had been a victim of domestic violence. The most reported disability was serious mental illness ( $n=525$ , 13%). For all respondents, 135 (3.4%) reported having multiple disabilities (2 or more: does not include being a victim of domestic violence).

**Table 4: Disabilities - All Respondents**

DISABILITY	<i>N</i>	% of all respondents
Serious Mental Illness	525	13.1
Substance Use Disorder	419	10.4
HIV/ AIDS	13	<1
Victim of Domestic Violence	739	18.4
<b>Total</b>	<b>1696</b>	<b>42.2</b>

Self-identified disabilities had implications for chronic homelessness. Chart 4 illustrates that 45% of respondents with a serious mental illness, 42.5% of individuals with a substance use disorder, 33.3% of respondents with HIV/AIDS, and 34% of those reporting domestic violence met criteria for chronic homelessness, respectively. These data are for adults only (18 and older).

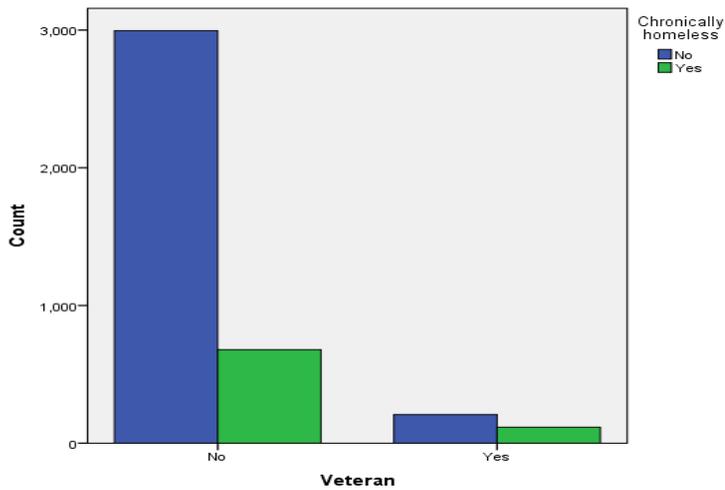

**Chart 4: Disabilities**

## 2. Veteran Status

Each respondent was asked if he/she had ever served in the armed forces. The majority of respondents reported “no” ( $n=3715$ , 92.4%). Of the 332 who reported “yes,” 34.9% ( $n=116$ ) met criteria for chronic homelessness. In addition, 35 of the veterans surveyed were female (10.5%).

**Chart 11: Veteran status by Chronic Homelessness**

## Appendix A: Incidence by County

## I. Incidence of Chronic Homelessness

County	Chronically Homeless	Percent of Respondents in County
Alamosa	67	38.5%
Bent	0	0%
Conejos	0	0%

Montezuma	37	60.7
Morgan	5	17.9%
Pitkin	12	44.4%
Pueblo	549	30.1%
Rio Grande	1	20%
Saguache	2	50%
Weld	101	39%

**V. Age of Respondents by county**

<b>County</b>	<b>&lt;18</b>	<b>18-24</b>	<b>25+</b>
<b>Alamosa</b>	45	24	105
<b>Bent</b>			201
<b>Conejos</b>		1	9
<b>Costilla</b>	24	24	126
<b>Eagle</b>	4	2	1
<b>Fremont</b>	10	17	59
<b>Garfield</b>	29	13	116
<b>La Plata</b>	19	5	67
<b>Larimer</b>	69	28	284
<b>Las Animas</b>	7	2	21
<b>Logan</b>	8	1	4
<b>Mesa</b>	94	57	331
<b>Montezuma</b>	0	8	53
<b>Morgan</b>	0	8	20
<b>Pitkin</b>	0	1	26
<b>Pueblo</b>	465	120	1243
<b>Rio Grande</b>	0	1	4
<b>Saguache</b>	0		4
<b>Weld</b>	73	18	168

Other measures may be under-represented because some form items can only apply to the head of household. For example, the sleeping location of the family was not assumed for subsequent household members based on the head of household's response.
