A Snapshot of Homelessness in the

Colorado Balance of State Continuum of Care

2018 Homeless Point in Time Study

Sheltered Count

OMNI

Acknowledgements

Regional PIT Coordinators work to publicize the count and provide updated information about homeless programs in their region. Prior to and during the count, coordinators arrange and communicate with point people in each identified program. They provide training, coordinate surveyors and volunteers, and distribute survey forms. PIT Coordinators also collect and organize all PIT forms to help compile the data quickly and efficiently.

The 2018 point-in-time (PIT) count for the Colorado Balance of State Continuum of Care (CoC) would not have been possible without the participation of the Regional PIT Coordinators and their many volunteers.

Table of Contents

Introduction

Each year the Colorado Balance of State Continuum of Care (CoC) conducts a point-in-time (PIT) study of the homeless population in Colorado's non-metro and rural counties. The PIT count has two major goals:

- Conducting an unduplicated count of individuals and families meeting the HUD definition of homelessness
- Capturing information about demographic characteristics and risk factors related to homelessness
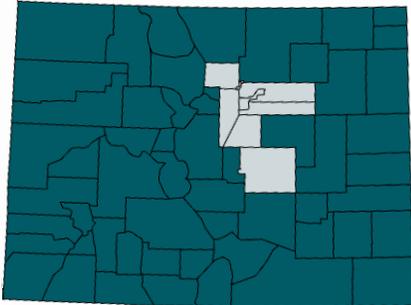

The CoC covers 56 counties across Colorado.

The Balance of State CoC covers the 56 non-metro and rural counties of Colorado. This includes all counties outside of metro Denver and Colorado Springs (El Paso County). This year the point-in-time count was held the night of January 23, 2018.

Annual PIT counts are required by the United States Department of Housing and Urban Development (HUD) as a condition of applying for HUD homeless assistance funds. Point-in-time counts are important because they provide yearly data to quantify the scope of homelessness and help national, state, and local policymakers track progress towards the goal of ending homelessness.

Methodology

During even numbered years, the CoC conducts a sheltered PIT count. During odd numbered years, the CoC conducts both a sheltered and unsheltered PIT count. In 2018 the CoC conducted a sheltered PIT count of individuals and families staying in emergency shelters and transitional housing programs. The PIT Count was conducted in accordance with the HUD methodology guide[1] and the HUD data collection notice[2] for the 2018 count. The survey instrument was developed by the Colorado Coalition for the Homeless (CCH), in consultation with their research partner, OMNI Institute.

Regional PIT Coordinators throughout the state were responsible for planning the PIT count in their regions, training staff and volunteers, and conducting the count. On January 23, service provider staff and volunteers administered the PIT survey forms to sheltered homeless people throughout the Balance of State region. Eighteen counties participated in the 2018 PIT count.

> **Sheltered PIT count** includes people who are staying in emergency shelters or transitional housing programs.
>
> **Unsheltered PIT count** includes people whose primary nighttime residence is a public or private place not designated for or ordinarily used as a regular sleeping accommodation for people (for example, the streets, vehicles, or parks)

[1] Point-in-Time Count Methodology Guide, HUD, 2014
[2] Notice for Housing Inventory Count (HIC) and Point-in-Time (PIT) Data Collection for Continuum of Care (CoC) Program and Emergency Solutions Grants (ESG) Program, HUD, September 20, 2017

Survey forms were collected and reviewed by CCH. OMNI Institute completed data entry of all the PIT survey data. The research team performed numerous checks to identify data entry errors, logic errors, and duplicate surveys. A total of 14 surveys were removed in the data cleaning process – 9 surveys were removed due to missing data and 5 surveys were identified as duplicates and removed.

Interpreting PIT Data

The point-in-time count provides a snapshot of homelessness on a single night in January. Due to the transient nature of the population and the large geographic area of the Balance of State region, it is extremely difficult to capture all homeless individuals and families. Because of this, the 2018 PIT count should be considered an underrepresentation of homelessness in the Balance of State region.

The PIT survey relies on self-reporting, which may impact the data. Individuals may be unwilling to disclose certain information or may not realize that they meet the criteria for a specific condition. Many of the disabling conditions included on the PIT survey are stigmatized, which may lead to underreporting.

Finally, changes in the homeless population year to year cannot be solely determined by examining PIT data. Each year changes are made to the PIT methodology and survey forms. Additionally, local conditions such as the number of participating agencies, the number of volunteers, and unseasonably warm or cool weather can impact both the number of individuals who seek shelter and the number of individuals included in the PIT count. We recommend caution when comparing PIT count data over time. Increases or decreases in the homeless population may be due to methodology or changes in local conditions instead of true changes in homeless populations.

Snapshot of 2018 PIT Data

1,481 homeless men, women, and children in emergency shelters and transitional housing programs in the Balance of State region in 2018

Over 50% of homeless individuals were surveyed in Mesa County, Larimer County, and Pueblo County during the 2018 PIT Count

% of PIT Data

0%   20%
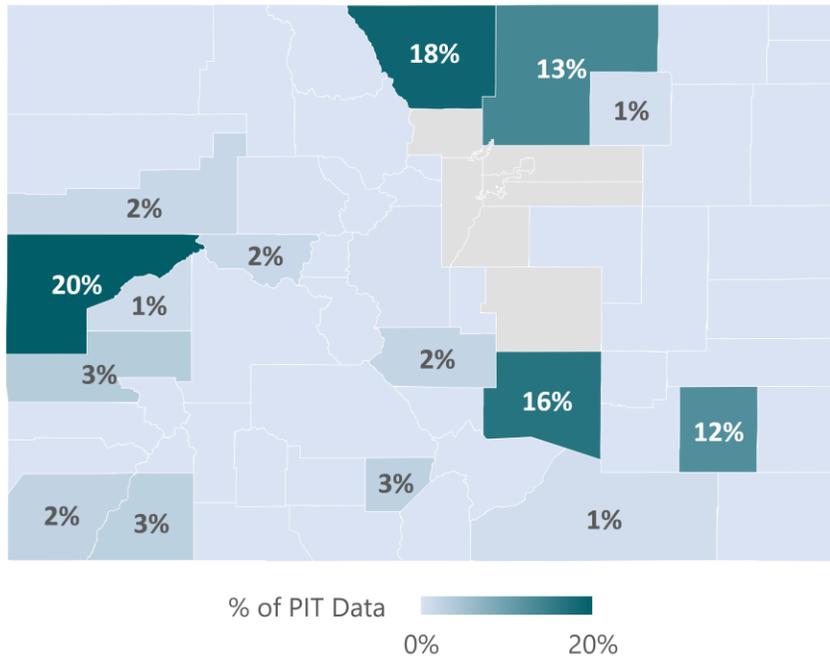

36% were families with children

41% have at least one disabling condition

15% were chronically homeless
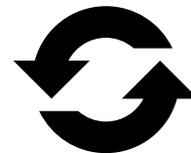

14% were fleeing domestic violence

8% were veterans

7% were youth

Findings

Across the Balance of State region, there were 1,481 homeless men, women, and children staying in emergency shelters and transitional housing programs in 2018. HUD groups individuals into one of three "household types" – households without children; households with at least one adult and one child; and households with only children. Children are defined as persons under 18. In 2018, the majority of households did not include children.

Table 1. Household Type

	Frequency	Percent
Household without Children	942	63.6%
Household with at Least 1 Child and 1 Adult	535	36.1%
Household with Only Children Under 18	4	0.3%

Demographics

Respondents reported the age range for each household member – adults (over age 25), youth (age 18-24) or children (under 18). Because exact ages were not reported, average age cannot be reported. The majority of individuals counted were adults over the age of 25. Less than a quarter of individuals were children under 18.

Table 2. Age

	Frequency	Percent
Children (age 0-17)	322	21.7%
Youth (age 18-24)	108	7.3%
Adults (age 25+)	1051	71.0%

Male identified respondents outnumbered female identified respondents nearly two to one among the homeless persons counted.

Table 3. Gender

	Frequency	Percent
Male	914	61.7%
Female	557	37.6%
Missing	4	0.3%
Transgender	3	0.2%
Gender Non-Conforming[3]	3	0.2%

---

[3] Does not identify as exclusively male or female

Approximately three-quarters of those counted reported their race as White, and two-thirds reported their ethnicity as Non-Hispanic/Non-Latino.

Table 4. Race

	Frequency	Percent
White	1102	74.4%
Multiple Races	140	9.5%
Black or African American	81	5.5%
American Indian/Alaskan Native	77	5.2%
Missing	66	4.5%
Asian	9	0.6%
Native Hawaiian or Other Pacific Islander	6	0.4%

Table 5. Ethnicity

	Frequency	Percent
Non-Hispanic/Non-Latino	980	66.2%
Hispanic/Latino	441	29.8%
Missing	60	4.1%

Risk Factors

For each household member, respondents were asked to report the presence of serious mental illness, developmental disability, substance abuse disorder, HIV/AIDS, PTSD, brain injury, or chronic physical illness or disability. The most commonly reported disabling conditions were substance abuse disorders and chronic physical illnesses or disabilities.

Table 6. Disabling Conditions

	Frequency	Percent
One or More Disabling Condition(s)[4]	606	40.9%
Substance Abuse Disorder	249	16.8%
Chronic Physical Illness/Disability	243	16.4%
Serious Mental Illness	174	11.7%
PTSD	150	10.1%
Developmental Disability	75	5.1%
Brain Injury	57	3.8%
HIV/AIDS	3	0.2%

---

[4] Represents the percentage of respondents who reported one or more disabling conditions (serious mental illness, developmental disability, substance abuse disorder, HIV/AIDS, PTSD, brain injury, or chronic physical illness/disability)

Within the counted homeless population, there were several small but significant sub-populations[5]. Approximately one out of seven individuals were currently homeless due to domestic violence and one out of twelve individuals were veterans.

2%	7%	8%	14%
were parenting youth	were unaccompanied youth	were veterans	were currently fleeing domestic violence
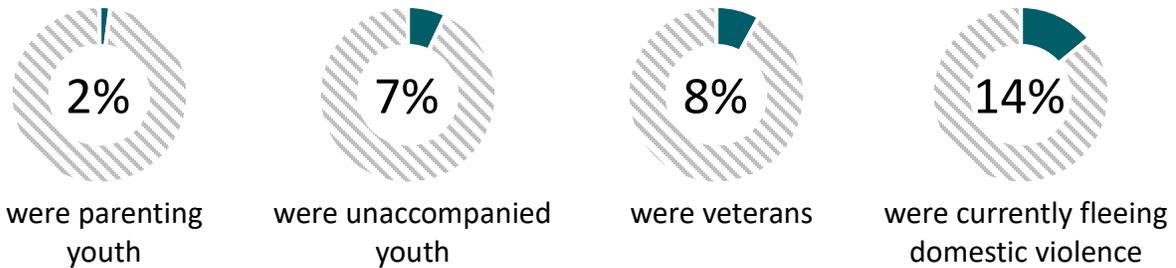

Table 7. Sub-Populations

	Frequency	Percent
Currently Fleeing Domestic Violence	203	13.7%
Veteran	124	8.4%
Unaccompanied Youth[5]	80	7.3%
Parenting Youth[5]	16	1.5%

Approximately one out of seven individuals were chronically homeless[6]. The percentage of chronic homeless individuals among veterans was similar to the percentage across the entire counted population.

13%	15%
of veterans were chronically homeless	of individuals were chronically homeless
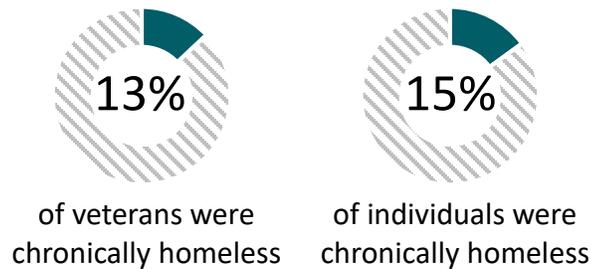

Table 9. Chronic Homelessness[6]

	Frequency	Percent
Chronically Homeless Individuals	218	14.7%
Chronically Homeless Veterans	16	12.9%

---

[5] **Unaccompanied youth** are persons under age 25 who are not accompanied by a parent or legal guardian and are not a parent to any children. **Parenting youth** are youth who identify as the parent or legal guardian of one or more children who are present during the PIT count.
[6] **Chronically Homeless Individuals** are (1) homeless and living in a place not meant for human habitation, a safe haven, or in an emergency shelter (2) have been homeless continuously for at least 1 year or on at least four separate occasions in the last 3 years where the combined length of time is at least 12 months; and (3) have a disability

Conclusion

The 2018 Point in Time count was a success due to the hard work and dedication of staff and volunteers across Colorado. It is extremely difficult to gather Point in Time data due to the large geographic area of the Balance of State region and the transient nature of homeless populations. The 2018 count should be considered a conservative estimate of sheltered homelessness in the Balance of State region.

The 2018 Point in Time count provides valuable information about the sheltered population. There are many takeaways from the data contained in this report including:

- 1,481 individuals were staying in emergency shelters or transitional housing
- 36% were families with children
- 29% were under the age of 25
- 41% of the sheltered population reported at least one disabling condition
- 15% were chronically homeless
- 14% were currently fleeing domestic violence
- 8% were veterans

Additional data is included in the appendices. Appendix A includes information on household type, veteran status, individuals with one or more disabling conditions, and chronic homelessness for each county and entitlement city. Appendix B provides a summary of the Point in Time data gathered for each county and entitlement city.

The 2018 Point in Time count provides required data for federal funding through the HUD homeless assistance funds. The data included in this report will be used by the Colorado Balance of State Continuum of Care and other stakeholders to inform additional outreach, service and program planning, and policy decision making as they work to address homelessness.
